

## Program Outcomes: B.Des. (Fashion Design)

**PO1: Design Knowledge** – Apply the knowledge of art, culture, design, textile, and management to solve the design problems pertaining to fashion industry.

**PO2: Investigation of issues** – Use research methods for problem identification, collecting and interpreting data, and analysis to propose design solutions.

**PO3: Analysis** – Identify, research, analyze, and design based on the market demand considering environmental factors.

**PO4: Design Development** – Developing Design solutions that meet the specific user needs, customized and prêt-à-porter requirements.

**PO5: Advanced Tools and Techniques** – Identify, select and apply appropriate techniques, resources and digital tools including prediction and design development.

**PO6: The Designer and Society** – Develop a deep understanding of the intricate relationship between design and society, examining the impact of design choices on cultural and social dimensions, to create responsible and meaningful designs.

**PO7: Environment and Sustainability** – Being sensitive to environment, provide solutions by applying sustainable design strategies.

**PO8: Ethics** – Apply ethical principles and commit to professional ethics and consideration for design profession.

**PO9: Individual and teamwork** – Function effectively as an individual, as a member or leader in a diverse team, and in multidisciplinary settings.

**PO10: Communication** – Ability to communicate through technical sheets, reports, portfolios and presentations.

**PO11: Project management and Finance** – Create a productive working environment focusing on time constraints, costing, optimizing resources for outcome.

**PO12: Life-Long learning** – Cultivate a capacity for self-directed and lifelong learning, acknowledging the imperative of adapting to evolving needs and technological progress.
